

## **HOLD HARMLESS AGREEMENT**

Midwest Energy & Communications (MEC) is committed to completing your project in a timely and professional manner. However, customer-owned underground facilities are not marked or protected by Miss Dig, so customers must agree to a Hold Harmless Agreement before we proceed. Also, despite our most diligent efforts, ruts or other cosmetic property damage may result as we move vehicles or equipment onto your property. The agreement is limited to the service location you are registering and expires upon completion of this project or removal of facilities.

Refusal to accept this agreement will delay the completion of this work and related services. If you have specific questions or concerns, please contact us at 800.492.5989. Thank you for your prompt response.

I agree that MEC and the Township of Lyndon, including any of their agents, contractors or sub-contractors are not responsible for damage to any unmarked, customer-owned underground facilities as it relates to work at the service location registered. This includes secondary electric, water, phone, gas, septic, well head and any other underground facilities. I further agree that MEC and the Township of Lyndon, including any of their agents, contractors or sub-contractors are not responsible for yard or property damage incurred as a result of accessing property for this project.
